TB Morbidity and Mortality Review

Facilitated by David Ashkin, MD
Medical Executive Director, A.G. Holley State Hospital
Medical Director, Southeastern National Tuberculosis Center (SNTC)

Wednesday, November 3, 2010 • 12:30 p.m. – 1:30 p.m. EDT
A.G. Holley State Hospital, 1199 Lantana Road, Lantana, Florida 33465

Join healthcare staff at A.G. Holley State Hospital as they conduct a quarterly TB Morbidity and Mortality (M&M) Review. This conference focuses on some of the most complex and challenging cases of patients with tuberculosis who receive their care at A.G. Holley State Hospital. The lectures provide unique opportunities to learn about drug resistance, TB/HIV co-infection, substance abuse and adverse drug effects in a case-based format.

The M&M Review is a traditional educational forum for healthcare professionals practicing in hospital settings. However, with web-based technology, healthcare professionals working in community public health settings or academic health centers can also take advantage of this educational opportunity from anywhere!

Upon completion of this training, participants will be able to:
- Demonstrate through case review the application of principles of transmission and pathogenesis of TB.
- Discuss risk factors and clinical conditions associated with tuberculosis.
- Describe the role of laboratory diagnostics in the diagnosis of TB.
- Identify challenges associated with co-morbidities of TB diagnosis and treatment.
- Outline and discuss TB treatment plans and how effectiveness and duration of treatment will be established.

Registration
Pre-registration is required online at: http://sntc.medicine.ufl.edu/training.aspx

Continuing Medical Education and Continuing Education
Credits have been applied for.
